

Are Self-Service Security Management Services Right for You?

Managing a self-service fleet is a HUGE task. Is your security strategy piecemealed? Do you question whether you're doing enough to protect your fleet and your customers? If so, it's time to enlist help. Answer the questions below to see if DN AllConnect Managed Security Services could be just what your organization needs.

> Do you worry about keeping up with the latest attacks on self-service terminals (and how best to mitigate them)?

> > NO

YES

You're not alone. Financial institutions lack full confidence in their current ATM security strategies and programs.¹ And retailers aren't immune to the security challenge. In 2016, retail software security breaches were up 40% over the prior year.

Do you have 24-hour monitoring of your self-service tech?

NO

NO

YES

YES

Do you complete routine security audits on your self-service terminals?

Audits are the ONLY way to understand the strengths (and weaknesses) of your self-service network. They serve as a benchmark so you can track your risk decreasing as you implement additional security measures.

NO

NO

NO

YES

Is this the best use

Have you had an incident

of your capital and operational expenditures?

In our resource-scarce environment, efficiency is everything. With a managed security services partnership, you're gaining a team that's operating behind the scenes so you can focus on customers.

or loss outside of business hours?

ATM attacks are on the rise. 54% of survey respondents reported an increase in ATM crime during the previous year, a 12% change from the year before that.²

YES

YES

Are the hard drives of your self-service terminals encrypted?

Consider that criminals can access an ATM, remove the hard drive and apply malicious code in well under 30 minutes.

YES

NO

Are you 100% confident in your organization's security strategy?

MAYBE
